

StockGrader — User Flow and Wireframes

Visual version: [wireframes.pdf](#)

Planning artifact for the frontend. Maps every path a user can take through the app, and shows a low-fidelity sketch of every screen.

The wireframes are deliberately rough — boxes, labels, and notes about behaviour. Visual polish comes from Bootstrap during the build phase, not from these sketches.

User Flow

Navigation rules:

- NavBar is visible on every screen.

- When **logged out**, NavBar shows: StockGrader (brand) · Log in · Sign up .
- When **logged in**, NavBar shows: StockGrader · Home · Watchlist · Compare · Welcome, <name> · Logout .

Wireframes

Six screens. For each one: the main element, the actions a user can take, and the four states the instructor requires (happy / loading / empty / error).

1. Login /login

+-----+	
StockGrader	Log in Sign up <- NavBar
+-----+	
Log in	
[Error alert (red) – only if failed]	
Email	
[_____]	
Password	
[_____]	
[Log in]	
Don't have an account? Sign up	
+-----+	

- **Main:** Email + password form.
- **Actions:** submit form, click "Sign up" link.
- **States:** *happy* → navigate to Home. *loading* → submit button shows "Logging in..." and disabled. *error* → red alert with backend message. *empty* → N/A.

2. Signup /signup

StockGrader	Log in	Sign up
Sign up		
[Error alert (red) – only if failed]		
Display name		
[_____]		
Email		
[_____]		
Password		
[_____]		
[Create account]		
Already registered? Log in		

- **Main:** Registration form.
- **Actions:** submit form, click "Log in" link.
- **States:** *happy* → log user in automatically + navigate to Home. *loading* → disabled button. *error* → red alert (e.g. "email already in use"). *empty* → N/A.

3. Home /

StockGrader	Home	Watchlist	Compare	[Dark]	Logout

Grade a stock					
Enter a ticker symbol or company name to get a letter grade and a five-point breakdown.					
[e.g. AAPL or Apple] [Get grade]					

Recent searches					
- MSFT	Microsoft Corporation	2026-06-03			
- AAPL	Apple Inc.	2026-06-03			
- GOOG	Alphabet Inc.	2026-06-01			
- ...					

- **Main:** Ticker-or-name search box.
- **Actions:** submit a ticker or company name → navigate to `/grade/:query` . Click a recent search row → navigate to `/grade/:ticker` . Toggle the NavBar dark-mode switch.
- **States:** *happy* → list of recent searches renders with each row showing ticker + company name + date. *loading* → "Loading..." placeholder. *empty* → "No searches yet — grade your first ticker above." *error* → "Couldn't load recent searches" inline message.

4. Grade Detail `/grade/:query`

The URL accepts either a ticker (`/grade/AAPL`) or a company name (`/grade/Apple`); the backend resolves names to the canonical ticker before fetching.

```

+-----+
| StockGrader Home Watchlist Compare [Dark] Logout |
+-----+
|
| AAPL $310.61 USD [Add to watchlist]
| Apple Inc.
|
| +-----+
| | |
| | B | <- letter grade, big
| | |
| +-----+
|
| Criteria
| [x] Topline revenue growth (long-term)
| latest: $416B vs earliest: $394B
| [x] Recent revenue growth (TTM)
| TTM: $451B vs latest: $416B
| [x] Net positive free cash flow
| latest FCF: $101B
| [ ] Free cash flow growth (long-term)
| latest: $99B vs earliest: $111B
| [x] Recent free cash flow growth (TTM)
| TTM: $112B vs latest: $101B
|
| Graded at: 2026-06-03 08:13 (from cache)
|
+-----+

```

- **Main:** Canonical ticker + share price + company name header, letter grade card, 5-criteria checklist with the actual numbers.
- **Actions:** "Add to watchlist" → POST /api/watchlist then show inline success/failure alert.
- **States:**
 - *happy* → grade + criteria render.
 - *loading* → spinner with "Grading <ticker> ...".
 - *empty* → N/A (a query is always specified by URL).
 - *error (logged out)* → friendly info alert: "Please log in to grade stocks" with Log in / Sign up buttons (no scary heading).
 - *error (logged in)* → "Couldn't grade ..." red alert.

+-----+					
	StockGrader	Home	Watchlist	Compare [Dark]	Logout
+-----+					
	Compare				
	Grade 2 or 3 stocks and see them side by side.				
	Stock 1 [AAPL] Stock 2 [MSFT] Stock 3 [GOOG]				
	[Compare]				
	[Cards] [Table]				
	+-----+				
	AAPL		MSFT		GOOG
	Apple Inc.		Microsoft Corp.		Alphabet
	\$310.61 USD		\$426.28 USD		\$355.50...
	B		B		B
	-----		-----		-----
	[x] R1		[x] R1		[x] R1
	[x] R2		[x] R2		[x] R2
	[x] R3		[x] R3		[x] R3
	[] R4		[x] R4		[x] R4
	[x] R5		[] R5		[] R5
	+-----+				
+-----+					

Table view (criteria as rows, stocks as columns — easier to spot where they differ):

+-----+				
[Cards] [Table]				
Criterion	AAPL	MSFT	GOOG	
	Apple...	Micros...	Alpha...	
	\$310.61	\$426.28	\$355.50	
	B	B	B	
-----	-----	-----	-----	
Topline revenue growth (LT)	Yes	Yes	Yes	
Recent revenue growth (TTM)	Yes	Yes	Yes	
Net positive free cash flow	Yes	Yes	Yes	
Free cash flow growth (LT)	No	Yes	Yes	
Recent free cash flow growth	Yes	No	No	
+-----+				

- **Main:** 2–3 tickers (or company names) compared side-by-side. Toggle between **Cards** (one card per stock with full criteria list) and **Table** (criteria as rows, stocks as columns).
- **Actions:**
 - Type tickers/names + submit → fetch via `GET /api/compare?tickers=...` and render.
 - Click **Cards** / **Table** to switch view.
 - Click any stock's column header (Table) or card header (Cards) → navigate to that ticker's Grade Detail.
- **States:** *happy* → toggle + chosen view render. *loading* → spinner with "Comparing stocks...". *empty* → form sits with defaults until submitted. *error* → if one ticker fails, that single card/column shows the error message; the others still render normally.

Consistency rules across all screens

- **NavBar** is identical on every screen and reflects login state.
- **Primary action button** uses the Bootstrap `primary` variant; destructive actions (`Remove` , `Logout`) use a muted style.
- **Error alerts** are a red Bootstrap `Alert` directly above the form or below the page heading.
- **Loading states** prefer disabling buttons + showing inline spinners over full-page blockers — feels snappier.
- **Empty states** explain *why* the list is empty and what to do next (never just a blank screen).
- **Mobile-first:** every screen should be usable at ~360px wide. The Compare screen stacks columns vertically below ~600px.
